

13. The method of claim 11 further comprising:  
determining at the network that resources are not available for providing the transmission service at the first level; and, in response to said determination, providing a second level of networking transmission service.

14. The method of claim 13 wherein providing the second level of networking transmission service further comprises:  
reassessing and redefining the deployed networking transmission service.

15. The method of claim 14 further comprising:  
determining whether reassessment and redefining of the deployed networking transmission policy was successful.

16. The method of claim 11 further comprising:  
determining whether there has been packet loss and wherein determining packet loss comprises:  
deploying a packet detector monitor in the network to generate network accounting records that can be used to determine packet loss.

17. The method of claim 11 wherein providing further comprises:  
establishing a differentiate services policy that is decomposed into a collection of configurations and deployed in a network.

18. The method of claim 11 wherein providing further comprises:  
deploying the configurations to a collection of routers or switches that the customer would have access to in the network.

19. The method of claim 19 wherein the accounting process that produces information at a granularity level at which the policies are actually deployed.
